

Digital Dentistry by Dental Wings

Dr. Amine Benalouane, Dr.Ir. Michiel van Genuchten

Wednesday, February, 1, 10.30 am – noon

Location: Room B

Dental Wings develops innovative dental CAD/CAM solutions designed to improve the quality of restorations and increase productivity of laboratories and clinics. Its product offering includes a full range of 3D dental scanners. Demonstrations of the functionality and performance of the 3Series and the 7Series scanner will be given by Dr. Amine Benalouane.

Dental Wings, 3M ESPE and Straumann have announced at IDS 2011 that they are joining forces to create an open global standard software platform. The new platform that is based on the DWOS (Dental Wings Open Software) software should allow a dental professional to design all prosthetic elements using one and the same software. DWOS is an open platform providing users freedom to use other scanning technologies to perform their designs. DWOS is successfully deployed in 30 countries and is offered in 12 languages. The benefits of DWOS 3.0 version of the software and the Dental Hub System will be presented by Dr.Ir. Michiel van Genuchten.
